PIR Motion Sensor alarms when motion is sensed or when the external contact is opened. It is battery powered and requires no installation tools. A Pyroflex™ sensor with HighBar™ signal processing allows for industry-leading pet immunity and catch performance.

**Features**
- Industry-leading pet immunity and catch performance
- Supports both motion zone and an external contact zone
- Mountable on walls or in corners
- 5 year warranty

**Enroll** by placing the panel into wireless enrollment mode and then sending a sensing event (e.g. tamper, motion, or external contact trip).

**Enrollment Tips**
- Power down the PIR after enrollment because the panel may mistakenly **double enroll** the PIR if it is tripped again while you are walking over to enroll the next sensor.
- Use loop 3 for the external contact. Loop 2 will NOT work.

**Motion Enrollment Panel Questions**
- Select RF sensor # (01 to 48)
- Select RF sensor type
- Select RF sensor equip type
- Select RF sensor equip code
- Select RF sensor other equip code*
- Select RF sensor serial number
- Select RF sensor age
- Select RF sensor loop number

**External Contact Enrollment Panel Questions**
- Select RF sensor # (01 to 48)
- Select RF sensor type
- Select RF sensor equip code
- Select RF sensor other equip code*
- Select RF sensor serial number
- Select RF sensor age
- Select RF sensor loop number

*Option not present in GC3 panel

Verify proper enrollment and operation using your control panel’s installation manual.
**Install** using the included 3M VHB® tape to adhere the motion sensor on a wall or in a corner. The tape should be applied to the **back** when wall mounting or to the **back bevels** when corner mounting. Alternatively, screw mounting can be done by punching out the screw mounting holes.

**Installation Tips**
- Mount 7.5 to 9.5 feet from the floor for an optimal balance between catch performance and pet immunity.
- Remove the cover and circuit board before trying to punch out the screw mounting holes.
- Ensure the bug foam stays intact and snug around the IR sensing element when re-installing the circuit board.

**External Contact** (not evaluated by ETL)
- Use a **normally-closed** contact because the motion sensor will transmit an alarm when it sees the external contact **open**.
- Do not use end-of-line resistors.

**Pro Tips**

**Walk test mode** is entered by pressing the motion sensor’s tamper button. The walk test lasts three minutes.

**Walk Test Operation**
- The walk test LED turns on when motion is sensed.
- The motion sensor performs a re-calibration after each activation. The re-calibration takes about 30 seconds. The sensor will NOT sense motion during the re-calibration.
- Wireless transmissions are sent for each detection, so walk test mode can also be used to test the panel.

**3M VHB tape** works great if the surface is properly prepared and firm pressure is applied for over 10 seconds.

**Surface Preparation**
- Clean the surface
- Ensure the mounting surface temperature is above 50 °F

**Motion lockout** is active for three minutes after a motion event is detected. During the motion lockout period, motion events will be ignored.

**Motion sensitivity** can be adjusted by the sensitivity jumper on the circuit board.

- Jumper Installed (lower sensitivity): Detects person in 3 to 5 steps. Increases pet immunity. Usually for security applications.
- Jumper NOT Installed (higher sensitivity): Detects person in 2 to 4 steps. Usually for occupancy applications.
**Pro Tips**

**Pet immunity** is optimized when the motion sensor is mounted at 7.5 to 9.5 feet high and aimed away from house features that could allow pets to be high in the detection field (e.g. stairs, counter tops, tall furniture).

**Motion catch performance** is best when the motion sensor is positioned so a person would typically walk across the front of the motion sensor instead of directly toward the motion sensor.

**Motion Detection Tips**
- Provide a clear line-of-sight to the monitored area and remember that glass blocks infrared energy (PIR = Passive InfraRed).
- Aim away from windows and sunlight.
- Aim away from air conditioners, heaters or heating/cooling vents.

**Accessories**

**Gimbal mount** (RE019 and RE019-10) allows the motion sensor direction to be adjusted after mounting on a wall.

**Horizontal beam lens** (RE020) has less look-down which results in increased pet immunity.

**Specifications**

**Side field of view for a mounting height of 7.5 feet**

**Side field of view for a mounting height of 9.5 feet**

Specifications subject to change without notice.

WARRANTY
Resolution Products, Inc. will replace products that are defective in their first five (5) years.

IC NOTICE
This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:
(1) This device may not cause interference, and
(2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux cnr d’Industrie Canada applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes:
(1) L’appareil ne doit pas produire de brouillage, et
(2) L’utilisateur de l’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.

IC: 8310A-RE210P

FCC NOTICE
This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference.
(2) This device must accept any interference that may be received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the Resolution Products, Inc. could void the user’s authority to operate this equipment.

FCC ID: U5X-RE210P

TRADEMARKS
“2GIG” is a trademark owned by Nortek Security & Control, LLC. Resolution Products, Inc. products will function with 2GIG systems. However, no Resolution product is produced by, endorsed by, or is officially associated with 2GIG.
Resolution recommends verifying proper enrollment and operation, per control panel installation instructions, at installation.
